The shortage of official coinage in the second half of the 18th century led to the second major series of privately issued tokens, mostly copper halfpennies, in the UK, together with many contemporary imitations and forgeries of the official halfpennies. These forgeries are now generally known as 'evasions' and little is known about the clandestine makers. The First Issue halfpennies of George III are dated 1770-75 and no further copper coins were officially issued until the 'cartwheel' coins by Matthew Boulton's Soho, Birmingham mint in 1797.

Rev: quadripartite incuse square with no legend. Extremely rare as didrachm. Not listed in standard references; (cf. Sear 1533 var.); see wildwinds.com (this coin and the CNG example). Didrachms are very rare. May lists only three in his corpus, CNG sold another similar (with griffin having a smooth wing and a feathered breast) 5 years ago (CNG 69, Lot: 230, described as unique and realised \$2,000 plus premiums; also ex CNG 55, lot 55). From the weight this can only be a didrachm and the fact that it is facing left limits it to Abdera.

SC records this type in a 2.62-2.80 gm module of around 15 mm diameter, but notes the existence of 2 specimens in the Afyon Museum weighing 3.06 and 4.51 gm suggesting the existence of a larger denomination of the type. The flan size for this coin is consistent with staters but the weight, at 2.25 grams, is significantly below the normally expected range for staters and also substantially more than normal for the smaller-format quarter staters. It is possible that this coin might therefore be a contemporary copy.

327 Roman Empire - Maximus of Spain - Barcelona Siliqua. 3.03 grams. Barcelona. Usurper, 409-411 AD. Rev: VI(CTOR-A) AAVGGG, Roma seated left on cuirass, holding Victory on globe and inverted spear. Mintmark SMBA. The Roma seated type with the VICTOR.. legend (the usual legend is VRBS ROMA or VIRTUS ROMANORVM) was used by several emperors (Arcadius, Constans, Constantine III, Eugenius, Flavius Victor, Glycerius, Gratian, Honorius, Johannes, Jovinus, Mag Max, Majorian, Priscus Attalus, Sebastian, Theodosius I and II, Valens, Valentinian I and II and some of the Visigoths - many of which are extremely rare usurpers), but Maximus is the only one who used the legend DN MAXIM... This is a good imitation of the only silver coin of the period known to have been made in Barcelona, with the SMBA mintmark. Barcelona (or Barcino as it was known) was used as a mint only for 2 years and only under Maximus. The mintmark SMBA was listed by Cohen but was doubted by many savants for over 100 years, until a bronze coin with the mintmark was found during excavations in Barcelona in 1958. The mintmark is rare and an imitation with the mintmark probably even rarer. Imit. RIC X 1601; Sear -. The last known example of a coin with this mintmark sold for 8,000 USD (CNG, Triton XIII, lot 426). Part not struck up, otherwise good very fine in good quality silver; excessively rare. See wildwinds.com (this coin).

Maximus was probably a relative of the general Gerontius who revolted against Constantine III in 409 AD. He was allowed to retire into private life when his master committed suicide in 411 AD. Maximus is potentially the same person as the Maximus Tyrannus who unsuccessfully attempted to seize power in Spain around 420 AD. Maximus Tyrannus was captured and publicly executed as a traitor at the games celebrating Honorius' tricennalia at Ravenna in 422 AD Philip Grierson (DOCLR, p. 219) has stated there are only about twenty known coins of Maximus.

THE TUTBURY 1831 HOARD

In 1831, while works were being undertaken in the bed of the River Dove at Tutbury, a vast hoard of medieval pennies was discovered. The discovery led to frantic digging by locals and the setting up of a Commission by the Chancellor of the Duchy of Lancaster (in whose domain the ancient rights of Treasure Trove rested). A small number of coins were recovered by the Commission and some of these are in the British Museum to this day.

The 26 coins offered here were the property of Lord Holland, received by him shortly after the hoard was discovered due to his position as chancellor. They passed after his death to William 'Edgar' Doggett, former page to Lady Holland and later librarian at Holland House. They then passed through the Doggett family until they were offered for sale in Canterbury by a descendant (Canterbury Auction Galleries, 4th April 2009, lots 192 and 193). The coins were grouped by mint and contained within paper wraps and these original groupings and wraps have been retained within this sale. Supporting documentation relating to these coins was included with lot 279a at the same sale (together with three Billy & Charlie badges offered later in this catalogue).

These coins now offered are the only known examples with a proven Lord Holland pedigree and Tutbury provenance in private hands. They represent a unique opportunity to acquire coins with this important pedigree. The group was accompanied by a hand-written list and a copy of this is included with each lot, together with handwritten notes from research in the British Museum Library to whom the coins originally belonged. The original documentation will be included with the lot that achieves the highest price. In the event of a tie, it will be included with the first lot sold.

Lord Holland (1733-1840) was Chancellor of Duchy of Lancaster at the time the hoard was discovered. The coins forming this group came to him through his position and passed with other items in this sale after his death, to William 'Edgar' Doggett, the librarian at Holland House.
